Corporate, entertainment, sports and celebrity leaders know that making and maintaining a successful lifestyle can sometimes be highly stressful... which can lead to problems, dependencies, anxieties, depression or poor performance. You don't have time for that.

Hypnosis provides solutions, not Band-Aids. . . now, not in 6 months. . . permanently, not “for awhile”.

Sharpen your memory.  
Conquer your game.  
Lose weight. Eradicate fears.

*Erase* and *eliminate* those things in life that are holding *you* back, or holding up *your life & success*.

Complete & absolute confidentiality assured for all clientele.

## What makes Success Hypnotherapy unique?

You can receive treatment in our local office if you're nearby.

You can receive onsite, at-your-home "house-call" treatment if necessary.

We travel regionally, provincially and internationally to work with a variety of professional and celebrity clientele.

### PLEASE NOTE:

Most conditions treatable via hypnotherapy have their worst symptoms cleared up and eliminated within two weeks of beginning an intensive course of hypnosis-assisted treatment.

This includes conditions such as quitting smoking, curing shyness, stuttering, anxiety, stage fright, stress issues, mood stabilization, memory issues, insomnia, blocked creativity, and related issues.

Results are entirely dependent upon a client's acceptance of the therapeutic modality, comfort with the relaxed hypnotic state, openness to dramatic improvements and changes to their lifestyle, and innate desire to succeed.

Thus, the operative question you must ask yourself is NOT "Can I be hypnotized?" Everyone can be hypnotized.

What you **must** ask yourself is

**"How intensely do I want to succeed?!"**

And the rest will fall into place automatically.

Over 95% of clients can achieve these rapid and transformative results within two weeks. In the extremely rare case a client is not able to achieve these results, they are informed as soon as this becomes apparent, and we will work with the client to assist in seeking other alternatives that may be more effective for their needs, thereby helping save time and money in pursuit of appropriate and time-efficient treatment.

All inquiries, sessions and treatments are completed in complete and absolute confidentiality and discretion.

NDCs (Non-Disclosure Contracts) and Confidentiality Agreements are part of the security procedures included.

### Notes of Importance:

- Transnational and international travel treatment requests typically require a minimum 72 hours' lead time for preparation; however, our "urgent" service (48 hours or less to onsite) requires a premium of \$1,200 for first activation.
- Fees are comprised of standard daily international travel per-diem rates plus accommodation and return travel costs.
- International and transprovincial clientele should typically expect a concentrated daily schedule of one to two sessions daily, to a usual series of from 6 to 14 sessions, depending on treatment dynamics, and are requested to anticipate and schedule accordingly. Usually clients will experience a complete resolution of issues in 3 to 8 days, depending on several factors: client interest, focus, imaginative creativity, etc.

Maximum effectiveness is then achieved in concentrated time, versus extending such work indeterminately.

- International and transprovincial client requests require a minimum 48 hours' lead notification for travel, first visit. Fees comprise standard daily international travel per-diem rates plus accommodation and return travel costs. Receptiveness to hypnotherapeutic techniques varies by individual.
- Clients should be aware that because of the rapid change that is effected with hypnotherapy, it is not necessary to see the therapist over and over for prolonged periods of time (such as typical psychiatry which can take several years to have effective results for the client). By compressing the treatment time into a short, intensive period, months and years of ordinary therapeutic work by conventional means can be avoided, and corresponding time and expense averted. The final take-away is that your life and health are back on track in dramatically less time; back living the dream, living YOUR life again.
